

PARTNERING FOR MEANINGFUL CHANGE

2015-16 ANNUAL REPORT

TIMMY
GLOBAL HEALTH

DEAR TIMMY GLOBAL HEALTH SUPPORTERS,

I am excited and proud to join Timmy Global Health as its new executive director. Timmy presents an incredible opportunity to fuse my passions and experience in global health service delivery, policy, and education towards a single goal: improving health in underserved communities, both today and in the future.

Timmy's work is made possible by an incredible community of supporters, all of whom inspire me every day. Our volunteers at home and abroad dedicate energy and expertise to strengthen community health in Ecuador, Guatemala, the Dominican Republic, and Nigeria.

Our Timmy chapter students play key roles on our service trips, help fund our referrals program, and work to address health challenges locally and globally. Our overseas partners facilitate our trips and referrals, help us invest in prevention, and ensure that we sustain deep ties to the communities where we work. Our financial supporters enable us to bring care and medicines to those most in need, and invest in communities' long-term health.

My vision is for Timmy to be a model of service as a bridge to community-owned development, founded on a base of trusting partnerships that deliver lasting returns on all sides.

I want to personally thank you for supporting the work that we do at Timmy Global Health. Together we are investing in the necessary care for people. We are offering hope. Thank you.

For Health,

A handwritten signature in black ink, appearing to read 'Kristina Graff', written in a cursive style.

Kristina Graff, Executive Director

MISSION: Timmy Global Health expands access to healthcare and empowers students and volunteers to tackle today's most pressing global health challenges. To achieve this goal, Timmy sends medical service teams to support the work of international partner organizations and channels financial, medical, and human resources to community based health and development projects. Through our work, we strive to empower volunteers to lead the fight for global health equity and help deliver the promise of a healthy future – one patient at a time.

TIMMY'S GOALS FOR ESSENTIAL ADVANCEMENT

Timmy Global Health believes all people, regardless of who they are, what resources they have, and where they live, should have access to quality healthcare. Timmy strives to make this vision a reality by strengthening the capacity of local health systems through short-term medical service programs and long-term health solutions.

By utilizing volunteer medical professionals, active student chapters, and community partners, we actively work together to accomplish our goals.

What initially started as a humble, grassroots effort now directly supports 10 community based projects sites in the Dominican Republic, Ecuador, Guatemala and Nigeria.

HOW TIMMY GLOBAL HEALTH WORKS

Step One:

Identify local communities in need of primary healthcare.

We strengthen the capacity of local partners through short-term medical brigades and long-term public health solutions.

Step Two:

Engage and partner with medical professionals, students, and community volunteers.

Our talented medical professionals work alongside local health care providers. High school and college student chapters across the country fundraise, serve, and advocate.

Step Three:

Track patient data and improve primary healthcare through our own Electronic Medical Record system, and referral systems.

Our healthcare providers have improved data collection, tracked patient conditions, and analyzed patient data more efficiently and effectively to make programmatic and clinical decisions using TimmyCare.

Step Four:

Build capacity through our "Continuity of Care" model.

Every 3 months we send volunteer medical teams to our partner communities to provide vital, primary healthcare. Our in-country staff and partners manage referrals so that all of our patients' healthcare needs are addressed--even after our medical teams have departed.

TIMMY GLOBAL HEALTH IN ACTION

Rosa is a mother of two beautiful children living in Quito, Ecuador. Recently, she started feeling some discomfort and visited a Timmy clinic through our local partner, Tierra Nueva, for answers.

Rosa was diagnosed with urinary sepsis. It began with an infection that would have been quickly and easily treated in the United States. Without treatment, however, it led to complications. The sepsis was eating away at her body, and slowly deteriorating her health. To complicate things even more, Rose was unable to pay for any of the medical treatment she needed.

Timmy invests in relationships with local organizations to make healthcare accessible for our patients. In Quito, we still have a great relationship with Tierra Nueva, our first international partner.

We partner with local medical professionals to assist in our referral program. If we can't treat patients, we make sure they get the care they need. Timmy Global Health strives to be with our patients through each step of treatment in our clinics.

We referred Rosa to a local hospital where she was cared for by a local nurse. She received the treatment at no cost to her, and has successfully recovered from her illness.

Timmy Global Health recognizes that it takes a team to care for a patient. Rosa returned to her family with her health restored thanks to the combined effort of the local MPC, Tierra Nueva medical professionals and local hospital staff.

TIMMY'S COMMITMENT TO GLOBAL HEALTHCARE

This year, **18,093** adults and children were treated in Timmy clinics, the highest number of patients treated since we began in 1997!

Our commitment to in-country partners and individual communities improves health outcomes in a systematic and profound way. Timmy's medical teams provide primary care services to partner communities every two to three months.

“We lead with our mission, priorities, and convictions for long-term, sustainable outcomes.”
- Kristina Graff, Executive Director

Through our unique approach — providing access to underserved communities, empowering volunteers to address global challenges, and partnering with local in-country organizations to build capacity and expand outreach, we are impacting lives on a daily basis.

MEANINGFUL CHANGE

In 2016, we provided year-round access to care with **10 international partner organizations**

\$1.9 million worth of medication and **\$75,500** spent on referral care

A DEEPER LOOK AT TWO TIMMY COMMUNITIES

Guangaje, Ecuador: An update from our newest site

Timmy is working with the onsite staff at the Centro de Salud de Guangaje; comprised of permanent and rotating staff, including an assistant nurse, gynecologist, dentist, physician, and four medical technicians. Due to understaffing in the local public hospitals, Timmy staff is working to create a network of private specialists in nearby cities to carry out referrals.

Rivers State, Nigeria: Investing in prevention

A key part of Timmy Global Health's history is the work it supports in three communities in Nigeria. We partner with the Bebor Model Nursery & Primary School in Rivers State to provide immunizations and deworming to the children. Vision services and chronic care programs are offered at Mercy Missions, our partner in the Uromi and Amichi communities.

“Together we work to engage patients in programs designed to teach preventative health measures and lifestyle modifications to improve overall quality of life and health outcomes.”

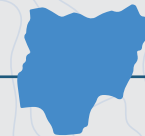

- Dr. Mercy Obeime, Founder of Mercy Missions and Timmy Global Health Board Member.

THE NEXT GENERATION OF GLOBAL HEALTH LEADERS

Student Volunteers

Timmy student chapters combat health disparities at home and abroad by serving on our medical teams, raising support for our partner organizations, and advocating for health equity.

On international trips, our student volunteers shadow and scribe for doctors, work in triage and assist in the pharmacy.

Student Chapters: Local Impact

- The IUPUI chapter volunteers at a free health clinic locally in Indianapolis.
- The Boston University chapter volunteers at a local food bank.
- The University of South Carolina chapter volunteers time at local homeless shelters and have put on “Timmy Movie Night” events at a local Ronald McDonald house.

Student Volunteer Snapshot

49 Timmy college and high school chapters

500 students traveled abroad with Timmy on trips

\$23,000 of scholarship funding disbursed to students and long-term volunteers

\$105,600 of funds raised by Timmy chapters for international partners

A woman with dark hair, wearing a teal jacket, is shown in profile, looking upwards and to the left. She is working on a bundle of electrical wires (yellow, orange, and black) attached to a grey concrete wall. Her right arm is raised, and she appears to be adjusting or connecting a wire. The background is a textured, grey concrete wall. The lighting is natural, coming from the right side, possibly from a window.

“ I choose to volunteer with Timmy Global Health because we are invited by local communities, **enjoy vibrant partnerships** with local physicians and nonprofits, provide **continuity of care**, and have an **extensive referral system**. All of this coupled with Timmy’s family atmosphere and commitment to service make Timmy Global Health **uniquely successful** this is why I continue to volunteer on Timmy trips. ”

- Brett Hesse, MD, Co-Medical Director, Volunteer since 2010

Medical Professionals

Medical professional volunteers serve on our medical teams, help strengthen our partnerships, and increase local capacity by working alongside in-country health care providers.

Our medical professional volunteer efforts are vital to our long-term continuity. Paired with strong, local public health partnerships, our medical teams help fulfill the promise we’ve made to our communities. Even after our medical teams have gone home, patients have access to the medicines they need, have contact with a community health worker, and receive subsidized surgeries and hospital care.

279 medical professionals traveled abroad

We are always looking for passionate health care providers to join a medical brigade. All medical providers (MDs, DOs, PAs, NPs), nurses, and pharmacists are welcome!

GRATITUDE FROM TIMMY GLOBAL HEALTH

“ Thanks to all of you at Timmy Global Health and the Tierra Nueva Foundation, I was able to receive the treatment I needed when I was hospitalized. My sincere thanks for unconditionally and economically supporting me in light of my illness. Today, I am healthy and I am now able to take care of my two children again. I am still recovering, but I wanted to express just how grateful I am for all of your help. ”

“ I would like to send a sincere thank you to you all for the medical attention that you offered and the medications that you provided to me. Everything I have received from you has contributed in a very positive manner to the betterment of my health. I am doing very well at the moment. ”

TH PATIENTS FROM ACROSS THE WORLD

“ I want to send my thanks [for funding] an operation for my daughter. She was suffering from an umbilical hernia. In the Hospital Padre Carollo, they treated us extremely well, and I would like to thank the doctor that operated on her — currently she is doing very well. For this, I send infinite thanks to Timmy, because I am a single mother, with only my own personal funds, I would have never been able to pay for the operation. My daughter is now happy and healthy. ”

“ I would like to send a warm thank you for helping me after I injured my left leg. I was completely immobilized for a very long time. I had no money to see a medical specialist [but thanks to the help I received] I was able to walk and begin working to provide for my family again. I am extremely grateful for the money that they offered me during my recuperation, and the help they continue to provide. ”

PARTNERING FOR MEANINGFUL CHANGE

We are in it for the long-haul

A woman in Guatemala participates in our nutrition program. She comes, not only for the tangible needs we meet, but also for education. We invest in her so that she can invest time and resources back into the community to make real, lasting impact today, tomorrow, and long into the future.

We are always with our patients

We are with our patients from the moment they set foot into a Timmy clinic until the moment they leave our care. Even when our medical service trips aren't active, we are working with our patients. We are making health investments that deliver higher returns.

We lead with our mission

As our founder, Dr. Chuck, says "We lead with compassion." We take an all-encompassing approach to health. We work with partners that take a holistic approach to patients and their health.

TIMMY GLOBAL HEALTH CHANGES LIVES

Primary Care

We take pride in meeting the primary care needs of every patient that comes to one of our sites through consistent and quality health care.

Patient Referral Program

We connect patients with local physicians in-country, so all patients are receiving the care they deserve.

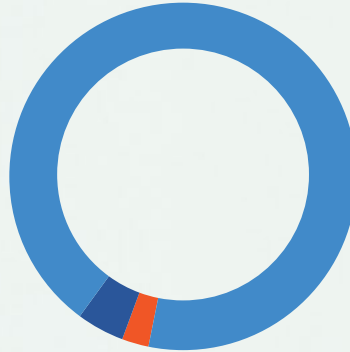

Prevention Work

We educate and train, so everyone we see can live a healthier life.
