12:30 PM **LUNCH**

1:30 PM **CHAPTER POSTER SESSION**

Location: TOWN HALL WEST

1:45 PM **CONFERENCE CLOSING AND EVALUATION**

Location: TOWN HALL WEST

Session Overviews

LISA RUSSELL: KEYNOTE SPEECH - SHIFTING THE STORY

For Timmy Global Health's keynote speaker, Lisa Russell, she believes we are just scratching the surface. During her presentation, she will screen her recent documentary film "Heroines of Health" (executive produced by GE Healthcare) before delving into her unique production process documenting three incredible women global health leaders from India, Kenya, and Indonesia. She will break down the storytelling devices she used in directing, shooting, and editing the film and give examples of how to break stereotypes of women in the developing world and change the narrative of global health. In addition, Lisa will give a preview to her upcoming "Immersive Storytelling for the Global Good Workshop" in NYC by introducing the exciting fields of VR and immersive storytelling and make the linkages on how the global health community can maximize these forms of technology to enhance our work for social impact.

SHANE O'DAY: KEYNOTE SPEECH: REFLECTIVE PRACTICES - A FOCUS ON INTERNAL DIALOGUE

How do we begin to make sense of the world while we are living in it? Shane will discuss specific reflective practices that he has learned and garnered along his own path of living and working overseas. Having visited over 50 nations and living overseas for over a decade, he has approached life with a sense of humor and humility. In his presentation, he will share not only strategies for reflection, but what it means to be human.

PEACE LEARNING CENTER: WHAT'S HIDDEN WITHIN - IMPLICIT BIAS 101

Biases, implicit or explicit, are destructive and harmful in our daily interactions and decisions. Join PLC as we help define bias, work through the emotions that come with our awareness without shame or blame, and learn how to address them with easy, tangible strategies.

MISSY TUCK: THE ESSENTIAL ROLE OF SAFE WATER AND WASH EDUCATION IN GLOBAL HEALTHCARE

Having access to primary healthcare and primary education without clean water, or having access to clean water and primary education without access to primary healthcare, has never worked. It is almost always true that achieving longevity and good health requires these three sectors to go hand-in-hand. When one is missing... the other two do not work effectively. As a global health leader, Timmy Global Health not only strives to address disparities in healthcare... but also address barriers to clean water and education. In this breakout session, learn what Timmy is doing to bring access to clean water and WASH education to vulnerable populations in the Amazon basin.

SCOTT PEGG AND MERCY OBEIME: TIMMY GLOBAL HEALTH - TWENTY YEARS OF SERVICE & LEARNING

In this session, you'll learn about the history of Timmy, how far we've come to get to where we are, and the works that Timmy does in Nigeria. Join us to meet our founders of TGH and learn about our Nigeria work!

SHARI RUDAVSKY: 10 REASONS TO HATE THE MEDIA - AND 10 REASONS TO LOVE IT

It's oh so chic these days to complain about the media. And there are definitely some areas where the mainstream can do better when it comes to reporting on healthcare. At the same time, the media is one of the few conduits between healthcare professionals and the people they serve. So rather than ignore the news altogether, it's best to have a nuanced understanding of it. Here's one journalist's take on 10 reasons to hate the media - and 10 reasons to love it.

DR. PETER SCHWARTZ: ETHICS - STORIES AND THEORIES

In this session, we will discuss a real-life story from medicine that raises important ethical questions. The discussion will lead to an appreciation for some of the strengths and weaknesses of stories in ethics and philosophical theories. Ethical analysis requires deep reflection on detailed and complex stories, and also theoretical analysis. We'll discuss training and experiences that can support your ability to engage with stories and theories.

MISSY TUCK: THE ESSENTIAL ROLE OF SAFE WATER AND WASH EDUCATION IN GLOBAL HEALTHCARE

Having access to primary healthcare and education without clean water, or having access to clean water and primary education without access to primary healthcare, has never worked. It is always almost true that achieving longevity and good health requires these three sectors to go hand-in-hand. When one is missing... the other two do not work effectively. Come learn what Timmy is doing to bring access to clean water and WASH education to vulnerable populations in the Amazon basin.

LINDSEY JUNK: PURSUING PERSPECTIVES

Stereotypes are single stories about a set of individuals that fail to appreciate or reflect any actual individuality. To provide the best care for those under our charge, we must actively cultivate a robust set of perspectives to work against the prevalent stereotypes. Together, we'll explore techniques for development of a wider world view.
